SUMMARY

Integration engineer with 6+ years building enterprise APIs on MuleSoft (Mule 4 certified), now designing agentic AI systems in which a model decides and tested, access-controlled tools act. Presented an AI sales assistant orchestrated with Einstein AI and a MuleSoft MCP server; designing and building Dant Saathi, a Hindi WhatsApp booking agent with Claude tool use, signed webhooks, duplicate-safe handling and a privacy-by-design data plan. Postgraduate in management (IMT Ghaziabad): comfortable turning business needs into working systems.

SELECTED PROJECTS

Dant Saathi: Hindi WhatsApp booking agent (in progress, testing)

- Designed the architecture: WhatsApp Cloud API → FastAPI webhook → Claude with tools → database, with an interactive architecture diagram and full documentation.
- Built: HMAC signature verification, duplicate-message guard, masked logs, delivery-status tracing and outbound replies. Diagnosed a platform account block through the provider's health API.
- Wrote a bilingual (English/Hindi) privacy policy, a DPDP-minded data plan, and security and conversation-test plans. Next: Claude tool use, booking tools and a staff view.

AI-powered sales assistant (presented to a global beverage client)

- Conversational assistant from product lookup to full order and inventory management, orchestrated with Einstein AI and a MuleSoft MCP server and client, with a Python / Streamlit front end.

EXPERIENCE

Accelirate Inc. · Application Developer 2023 to present

Global beverage company

- Presented the AI-powered sales assistant described above (Einstein AI, MuleSoft MCP server and client, Streamlit).
- Owned Print & Apply division integrations: labeling accuracy, automated packaging workflows, supply-chain system integration.
- Led the migration of Fulfilment APIs from Mule 3 to Mule 4.

Healthcare staffing firm

- Led a team of 4 building a client portal for healthcare and facility management.
- Auth0 for access management; user-level access control to Tableau dashboards through MuleSoft; simplified API for scheduling and timesheets.

Accenture · Application Developer 2021 to May 2023

Global pharma company

- Okta integration for registration; Salesforce integration for the back end.

US pharma distributor

- Orchestration APIs using a hub-and-spoke model with Salesforce integration.

Tata Consultancy Services · Application Developer 2019 to 2021

US energy utility

- REST APIs on Anypoint Platform; RAML specifications published through Exchange; basic authentication and client ID enforcement policies.
- Workday, SOAP and HTTP connectors; XSLT transformations; SFTP file creation; migrated integrations from DataPower to MuleSoft.

Supply-chain software vendor · Global automaker

- Proofs of concept for custom connectors with the Mule SDK (databases and services).
- Java Spring applications on AWS Lambda; converted complex DB2 scripts to AWS Aurora.

SKILLS

Agentic AI: Claude API and tool use, MCP, Python, FastAPI, guardrails, conversation evals.

Integration: Mule 4, API-led architecture, RAML, API Manager, DataWeave, CloudHub, Mule SDK connectors, IBM MQ, Workday, Salesforce, Okta, Auth0.

Cloud and engineering: AWS Lambda, S3, Aurora; Java, Spring, Maven; MySQL; Git.

Certification: Mule 4 Certified Developer.

EDUCATION

PGPM, IMT Ghaziabad (2021): business and team management.

B.Tech CSE, SRM University (2019): 89.08%. Technical head of Gen Hybrid Labs; final-year project (crop recommendation system) recognised by the department head; first prize in a physics project.

Research paper: IJAST, sersc.org/journals/index.php/IJAST/article/view/10819
